

Legacy Support

Legacy Support Services

Implementing or migrating to a new system is a daunting task and one that requires a lot of planning and capital. Direct Consulting Associates (DCA) understands this and is committed to making the client's implementation a success through our Legacy services.

Legacy System Resources

DCA is dedicated to providing resources and experienced consultants that will maintain our client's current legacy systems to keep sunset applications running. This allows for a successful transition that maintains operations—allowing for successful continuous care for

the patient.

Our Value Proposition

By streamlining and improving the end-user experience, your staff will be able to focus on a successful implementation of the new application without having to worry about the functionality of the old one – facilitating a seamless transition.
